ABOUT THE PRESENTATION

Mr. Richard Blumberg will talk about the Internet: what's there, how it's organized, the various techniques for access to information, and how (and how soon) all that is likely to change. Mr. Blumberg will demonstrate the use of Internet and its capabilities as a part of this presentation.

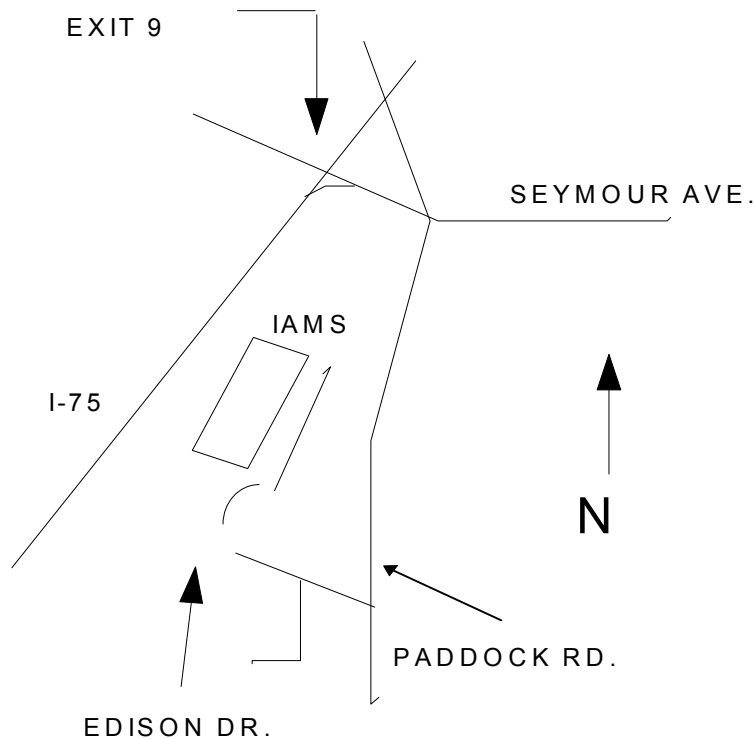

BACKGROUND OF THE SPEAKER

Richard Blumberg is a founder and principal partner in Productivity OnLine, Inc., a community-focused electronic information service presenting highspeed access to Internet services, MetroLink connection to Cincinnati-area governments and groups, access to document and software archives, and customized information services for businesses and individuals.

Mr. Blumberg has served as a consultant on computer-mediated communications to a wide range of clients, including Hamilton Fixture, Frigidaire Corporation, and Proctor & Gamble. His most recent work has focused on Internet connectivity and multi-platform networking. In addition to his position with Productivity OnLine,

he is a principal partner in Command Central, Inc., a company formed to develop software and integrate systems to automate the purposeful movement of information across networks.

CHAIRMAN'S MESSAGE

by Jim Everly

Last month's meeting was a tour of the Greater Cincinnati/Northern Kentucky International Airport. The tour was conducted by Mr. Ted Bushelman, Director of Airport Communications, and featured the airport's new video media center together with some of the more interesting details of the \$500 million expansion effort. A sincere thanks is extended to Mr. Bushelman for the effort he expended on behalf of the Cincinnati Section of the IEEE.

The Spring Quarter meeting of the Cincinnati Section Executive Meeting was held on Thursday, April 28, 1994. The agenda for the meeting is printed elsewhere in the newsletter. The Committee voted to support "Cash Awards for Senior Projects" in the amount of \$500 for each of our student chapters. The awards are to be given to students who demonstrate technical competence and uniqueness in their Senior Project. Last year the awards were well received by both students and faculty, and the Cincinnati Section is pleased to extend financial support again this year.

The section is looking for a person to fill the Executive Committee slot of Program Chairman. The committee is putting together a list of requirements for the position. If you think you might be interested in the position, give me a call. The committee is also concerned about the form and content of our monthly Newsletter. Let me hear from you if you have any comments relevant to "the needs of the membership" that can be satisfied by the Newsletter.

Our next Section Meeting is the golf outing on Friday, June 3, 1994, at the Fairfield Golf Course. This is the IEEE Cincinnati Section social event of the year. We will have plenty of prizes and a sit down charcoal grilled steak dinner. You do not have to play golf to attend. However, if you plan to play golf, make your reservations early.

The Newsletter is not published over the summer. We need to give Bob Morrison, our Editor, some time off. The September meeting will be a tour of some interesting place or facility. The details of the tour will appear in the September Newsletter. Have a safe and enjoyable summer!! I'll see you again in the Fall.

Ed. Note: See the flyer elsewhere in the Newsletter concerning the Golf Outing.
